

## Don't Panic – Photo Edition Fact Sheet

### Product Description:

Don't Panic - Photo Edition is digital photo recovery software that extensive research has been put into to ensure recovery of all the latest digital image file types as well as regular file types ensuring support for more memory cards and image formats than any other digital photo recovery software including RAW image formats. With support for the widest range of file types around Don't Panic - Photo Edition ensures support for both professional and amateur photographers alike. Don't Panic - Photo Edition has been streamlined for a faster, stronger and more resilient performance.

### Don't Panic - Photo Edition Advanced Features

- **Back up my Device** allows the user to create a safe copy of everything that is on your memory card or flash device
- **Faster** recoveries (10% faster than previous versions)
- **Restore my Device** will restore the backup files you have created using 'backup files'
- **Secure erase my Device** completely erases all data from the card ensuring old files do not harm the recovery and cause corruptions
- **Backup** recovered images to CD or DVD which is a new addition to the don't panic range
- **Automatically** detects the card drive creating a simple user friendly interface
- **Writes** files to CD as well as DVD a new addition to the Don't Panic range
- **Checks** cards for damage
- **Saves** recovered images directly to pc and CD/DVD
- **Views** photos during the recovery process

# Don't Panic - Photo Edition System Requirements

Don't Panic - Photo Edition requires the following:

- Microsoft Windows Operating System (2000 and above)
- A minimum of 256mb of RAM
- 15mb hard drive space for installation
- Additional hard drive space for storing images
- A card reader or mass storage compatible camera
- A CD/DVD writer for use with the CD/DVD burning facility

The space required is dependant on what you're hoping to recover from, for example, if you are intending to recover from a 512mb memory card you will need 512mb of free space to store the recovery too.

## Flash Cards Supported

Don't Panic - Photo Edition recovers files from the following:

- Xd picture cards
- Compact flash cards
- Secure digital cards
- Memory stick pro duo/pro
- Multimedia cards
- Microdrive

## Digital Formats Supported

Don't Panic - Photo Edition recovers photo, video, sound and data files from more digital formats than any other software including:

- RAW -
  - MRW = Minolta
  - CRW = Canon CCD and CMOS variations
  - CR2 = Canon
  - X3F = Sigma
  - RAF = Fuji
  - ORF = Olympus
  - DCR = Kodak
  - NEF = Nikon
  - PEF = Pentax
  - PIX = Pixar
- JPG
- AVI
- MOV
- WAV
- WMA

All these listed and many more can be recovered. There really is no limit to the files Don't Panic - Photo Edition can recover when successful in the turbo scan.

## Product Support

Don't Panic - Photo Edition is supported by ImageRecall in the UK and through its distributors in Europe and the US.
