

ImageRecall releases specialist recovery software for Mobile Phones

The quick and easy way to recover lost or accidentally deleted files from your Mobile Phone's Memory Card

SOUTHAMPTON, ENGLAND, November 26th, 2007 – The experts in Data Recovery at ImageRecall are pleased to announce the release of *Don't Panic Mobile Edition* – the latest release in their best selling Data Recovery series.

The new version of the software has been created to address the growing need to recover accidentally deleted or corrupted files from the types of Memory Card used in today's multi-function Mobile Phones. A wide variety of files can be recovered, including: Photos, Videos, MP3 Tracks and Ring Tones.

Graham Beavis, Product Manager at ImageRecall, says; "*Don't Panic Mobile Edition* will offer Mobile Phone Users the best possible software recovery solution on the market today. By creating bespoke software for an individual channel, we can deliver improved performance against generic software, and offer total peace of mind when data gets lost!"

ImageRecall has been established for over six years, and is at the forefront of customer disaster-management in the digital high street. The latest version of the company's best-selling Photo Recovery software, *Don't Panic Photo Edition* was released in 2006. Further releases are planned in 2008 including a specialist Hard Drive recovery tool.

'*Don't Panic Mobile Edition* will be available to download from www.imagerecall.com as well as on disc in major retailers around the country. The product will be distributed to the trade by Peak Development Ltd, Tel: +44 (0) 1489 796979 sales@peak-uk.com Web: www.peak-uk.com
